Module Name: UI & UX Design

UI & UX DESIGN

Q1. What do you understand by the term?

- a) •User experience
- b) •User interface
- c) •UX research
- d) •Research finding

Q2. List out the UX research methods and approaches.

Q3. What are the benefits of UX research?

Q4. What do you understand by the following term?

- a) Brand
- b) Brand competition
- c) Brand identity

Q4. what are the examples of brand identity?

Q5. Give three (3) main types of brand competition

Q6. What do you understand the term task analysis?

Q7. What is the different between user story and user personas?

Q8. What are the pathways to carry out task analysis?

Q9. What is the meant by the term end user pain point

Q10. What is the effect of pain points on the users?

Q11. Identify the different levels of end user pain point?

Q12. Cycle the letter corresponding to the best answer:

1. UX is:

A. User xampp

B. User unknown

C. User experience

Q13. UI is:

A. User Internet

B. User Intermediate

C. User Interface

Q14. Which of the following is a step in UX analysis?

A) Identification of user issues

B) Creation of marketing strategies

C) Budget planning

D) Hiring new staff

Q15. Which type of brand competition involves companies offering similar products to the same target market?

A) Indirect Competition

B) Replacement Competition

C) Direct Competition

D) Strategic Competition

Q16. Choose the correct answer of Steps of UI/UX Design Process:

- a) Product definition, Design
- b) Design, Research, Product definition
- c) Product definition, Research, Analysis, Design, Validation

Q17. According to the bellow statement answer by True or False

- a. Three Levels of Pain Points are plan, observation and Relationship.
- b. Pain points are problems that occur at the different levels of the customer

Q18. You have been tasked with designing a recipe sharing website called "Cookbook". The website

aims to provide a platform for users to share their favourite recipes, discover new ones, and connect with other cooking enthusiasts.

Please perform a UX research using other similar existing websites, develop a low fidelity wireframe that will be used to show the structure and layout of the website to be developed, and lastly show the interaction between features using a low fidelity prototype.

Here are the key features and functionality you should include in that low fidelity wireframe and prototype:

1. Homepage:

- A clean and visually appealing layout with a prominent search bar at the top.
- A featured recipe section showcasing popular recipes.

- Categories or tags to help users navigate through different recipe types.
- A login/signup button for new users.

2. Recipe Listing Page:

- A grid-style layout displaying multiple recipe cards.
- Each recipe card should include the recipe name, a brief description, and an image thumbnail.
- Sorting and filtering options to allow users to refine their search (e.g., sort by popularity, rating, or cuisine type).

3. Recipe Detail Page:

- A larger image of the recipe.
- The recipe name, description, and cooking time prominently displayed.
- A list of ingredients required.
- Step-by-step instructions for preparing the recipe.
- User ratings and reviews section.

4. User Profile Page:

- User's profile picture and basic information.
- A section displaying the user's uploaded recipes.
- The option to edit or delete their recipes.
- User's favourite recipes or a bookmarking feature.

5. Upload Recipe Page:

- A form to input recipe details, including the recipe name, description, cooking time, ingredients, and instructions.
- An option to upload a recipe image.
- Tags or categories to categorise the recipe.

Tools • Figma, Trello, Adobe XD
Equipment • Computer ,Projector .White-Board
Materials/ Consumables • Markers, Internet, Papers, Pens,
Pencils

Q19. What do you understand by the term user story?

Q20. What are characteristics of user story?

Q21. List out three (3) benefit of user story

Q22. What do you understand by the term user persona?

Q23. Give five (5) characteristics of user persona.

Q24. What are Benefits of User personas in design process?

Q25. What do you understand about the term user journey?

Q26. What are the element of user journey map?

Q27. List three (3) types of user journey map

Q28. Answer true or false to the following statements:/2marks per each

a) Step of UX designer's journey are five.

b) User journey help user to interacts with a product and allows designers to see a product from a user's point of view.

c) User story and user scenario are not important during design process.

Q29. Complete the following sentences with the following word: creative brief, user personas, story. 4marks

a) The written definition of a UX Designer's first visualization of the first wireframes and prototypes is

b) is a document used to outline the strategy of a creative project?

Q30. You are a UX designer working for an e-commerce company. Your task is to improve the online shopping experience for a specific target audience. In this case, your target audience is outdoor enthusiasts who are looking to buy camping gear from your website. The goal is to create a user-centered design that caters to their needs and preferences.

- Assessment Steps:

- ✓ User Persona Creation (15 minutes):

Begin by creating a user persona for an outdoor enthusiast. Include information such as demographics, goals, pain points, and motivations. Be as detailed as possible. You can use tools like online persona generators or templates to assist you.

Name your persona and provide a brief narrative that describes their background, preferences, and behaviors. This persona will represent your target user for the design project.

- ✓ User Story Creation (30 minutes):

Based on the user persona you've created, generate a set of user stories that address their

needs and goals. User stories should be concise and follow the "As a [user type], I want [an action] so that [benefit/value]" format.

Create a minimum of three user stories that cover various aspects of the outdoor enthusiast's shopping experience on the website.

✓ User Journey Mapping (45 minutes):

Select one of the user stories you've created and develop a user journey map for that scenario. Start from the moment the user decides to shop for camping gear and continue until they complete a purchase.

Include key touchpoints, actions, emotions, and pain points the user might encounter along the journey. Use a visual representation, such as a timeline, to illustrate the steps in the journey.

Q30. What do you understand by the following terms used in design of mockup?

- User interface
- User Experiences
- Wireframe
- Mockup
- Prototype
- User-centered design
- Usability
- 3-Clicks rule

- Feedback

Q31. What is the importance of UX/UI design the software development?

Q32. What are the important principles of user experience design?

Q33. Give five (5) stages found in design thinking process.

Q34. What are components of information architecture

Q35. What do you mean by the term wireframe?

Q36. Differentiate low fidelity and high fidelity wireframe

Q37. What are the tools used to create wireframe?

Q38. What do you mean by the term mockup?

Q39. Differentiate wireframe and mockup?

Q40. What is the relationship between wireframe and mockup?

Q41. What are additional visual details that can be applied to a such mockup?

Q42. Differentiate prototype and prototyping?

Q43. What is the important of presenting prototype?

Q44. Circle the correct answer

1) Which of the following is a type of user interface that uses visual elements like windows, icons, and buttons?

a) Command Line Interface (CLI)

b) Graphical User Interface (GUI)

c) Menu-driven User Interface

d) Voice User Interface (VUI)

Q45) Which user interface involves interaction through typing text commands?

a) Graphical User Interface (GUI)

b) Command Line Interface (CLI)

c) Touch User Interface

d) Natural Language User Interface

Q46) Which factor is NOT part of Peter Morville's User Experience Honeycomb?

a) Useful

b) Credible

c) Expensive

d) Findable

Q47) What is the purpose of a creative brief in a project?

a) To outline the strategy of a creative project

b) To create user personas

c) To define budget planning

d) To hire new staff

Q48) What is the primary goal of usability in UI/UX design?

a) To attract new users

b) To ensure the product is easy to use

c) To create a visually appealing design

d) To reduce development costs

Q48) Which of the following is a characteristic of a high-fidelity wireframe?

- a) Sketches on paper
- b) Detailed and may include simple workflows and interactions
- c) Basic outline without much detail
- d) Only includes text and no visual elements

Q49) A mockup typically includes all the following visual details EXCEPT:

- a) Colors, styles, graphics, and typography
- b) Styled buttons and text
- c) Navigation graphics
- d) User interaction feedback

Q50) What is the primary goal of a prototype?

- a) To outline the basic structure of a page
- b) To test and validate ideas before final development
- c) To create a static model of the page
- d) To organize information within digital products

Q51) What does the 3-click rule suggest?

- a) Users should receive feedback within 3 seconds
- b) No page should take more than 3 clicks to access
- c) Usability tests should be completed in 3 stages

d) Every page must have at least 3 clickable links

Q52) Answer by true if a statement is correct and false if is wrong

a) In the UX design process, the analysis phase involves creating user personas.

b) A prototype is an interactive simulation of a product designed to test the user experience.

Q53. ABC CO is an NGO with the mission of promoting education in Rwanda especially in TVET

schools, their office is located in GASABO District and they have organized a competition of the innovative project for students from different TVET schools. But they have a problem of collecting the student's applications from every school. They suggest having an MIS that will facilitate the students to apply and find more information about the competition.

So, they want to hire a user experience (UX) designer that will create a mockup and then present the prototype for that MIS. As a UX designer, you are requested to create a mockup that will be used by the web application developers to create a website that will perform that task.

The system will have the way all users can make authentication. A student can make an application to be reviewed by administrators. Administrators will be able to view and make decisions on the student applications in order to notify the accepted and rejected projects.

The students will be able to know whether s/he has been selected or not.

The system should be easy to use and adhere consistency in designs.

This work is supposed to be done in 8 hours.
